BEFORE YOU MIX

Flavour Shot vs One Shot – Recommended Mixing Ratios!

A **Flavour Shot is a commercial ready-made recipe** in a bottle! Just add VG (Vegetable Glycerine) and any extras.

Don't change the amount of concentrate in the bottle it's made to give the perfect taste every time.

A **One Shot** are ready to mix similar to a single flavour concentrate, but they are a commercial recipe.

Recommended Mixing Ratios

25–30% for mixing with VG
0.4% for brewing
6% for lip balms and more
